Subject: June 11, 2024 Meeting - Agenda Item 9.2 & 9.2.1

I wish to express my support for this item that is being brought forward by Mayor Guardhouse. Wind Turbine Projects. As you may be aware, Ontario currently has 2,603 Wind Turbines, that only generate about 3% of the need. The cost to human health, the environment and animals is simply not worth the return on investment. I would prefer to see the Town invest in education on energy savings, other sources of energy including solar and renewable energy.

I would ask that you please have this email circulated to Town Council and that my email be added as a written submission to the post agenda.

Thank you - Joanna Valeriani
